FUTURISTIC RESEARCH & DEVELOPMENT

REFORMING INDUSTRY STANDARDS

With continuous change in global market structure, the superlative solutions based on high technology advancement & expert analysis is the need of today's business.

| Connected Mobility & ERP Solution | Utilising The Power of Artificial Intelligence | Experiencing through VR & AR | Surprising Customers through Beacon | Customised Analytics merging multiple system centrally | Diluting customer reach limitation with web & app |
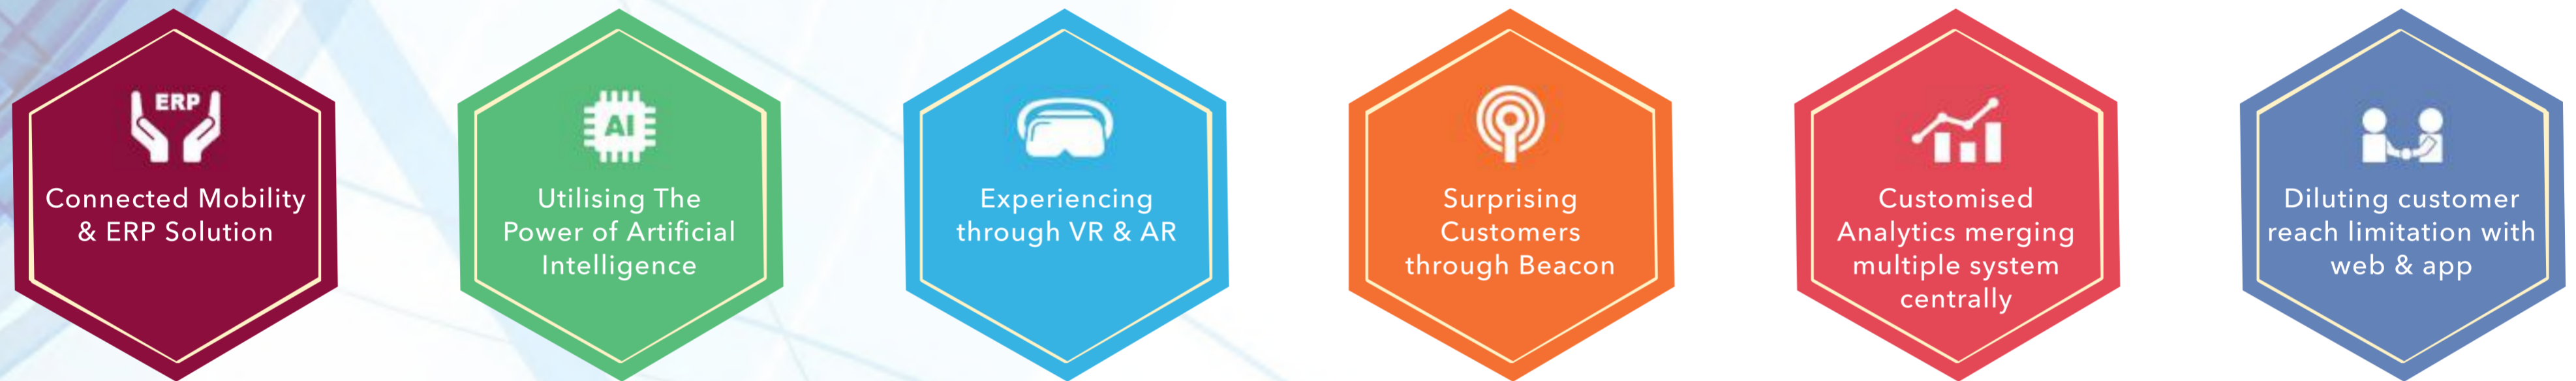

Tekshapers

We help you stay relevant by powering the core technology infrastructure to take advantage of these trends

1. Ideate	2. Validate	3. Efficiency	4. Scale
Confirm whether you are solving a real problem	Seek validalon that people are interested in your idea	Refine the Business Model, improve the user experience and focus on reliability of the system	Drive growth aggressively as network effects kick in

6
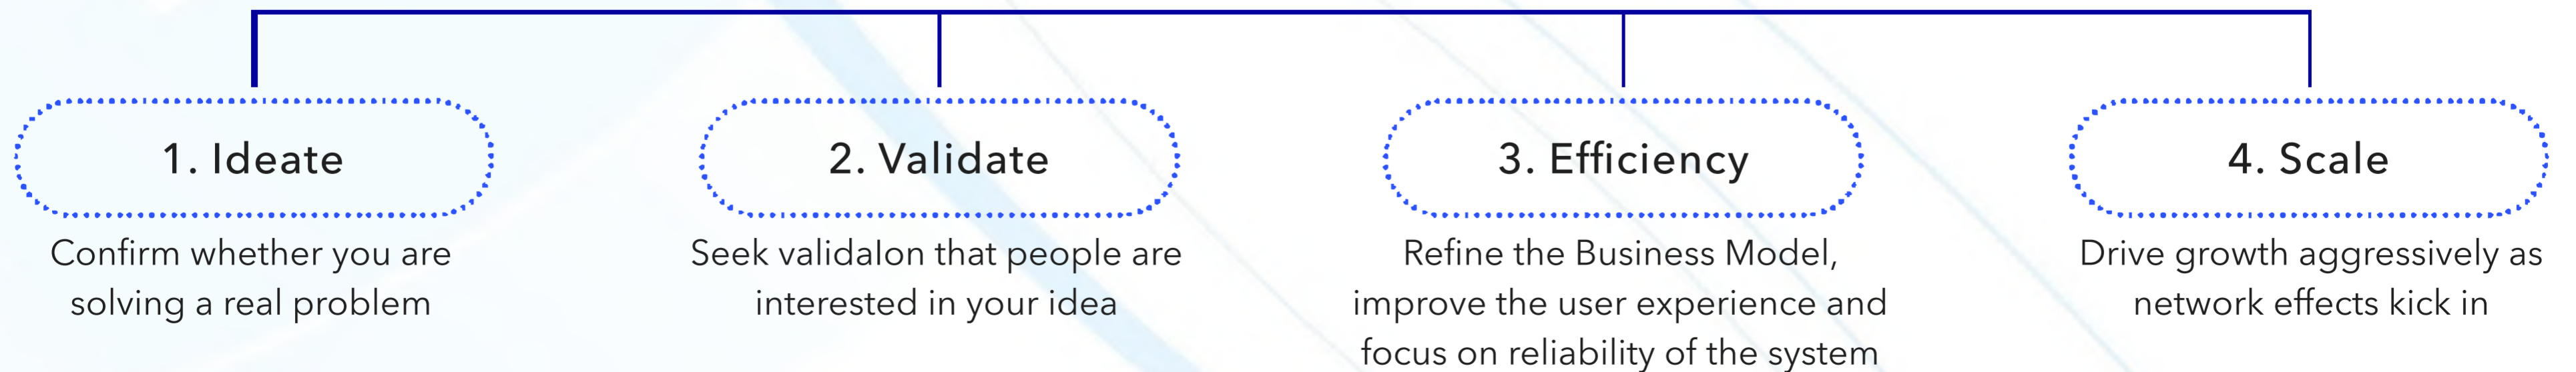

OUR BUSINESS APPROACH

We design unique custom IT solutions to address discrete business requirement.

Custom Freamework:

Project Management

Agile methodology- to plan & mange deliveries

Iterative Development Model toprovidecontinual feedback and eliminate rework

Open, transparent and periodic communication system for any time, as is project status

Short 2-3 weeks sprint cycle to measure progress and take corrective actions on weekly basis

DedicatedProject Coordinator as the point-of-contact for day to day communication

Afile Methodology to plan and manage Dekivery

Use industry standard tools such as "Target Process","Pivotal Tracker", "Mingle" and "JIRA"

Our Development Process

Short, time-boxed iterations; plan for one iteration and stick to it

•Requirements captured as story cards
•Frequent meetings scheduled to provide updates and status
•Extensive test-driven development

Demonstrate working software at the end of each iteration, feedback loop at the end of each iteration
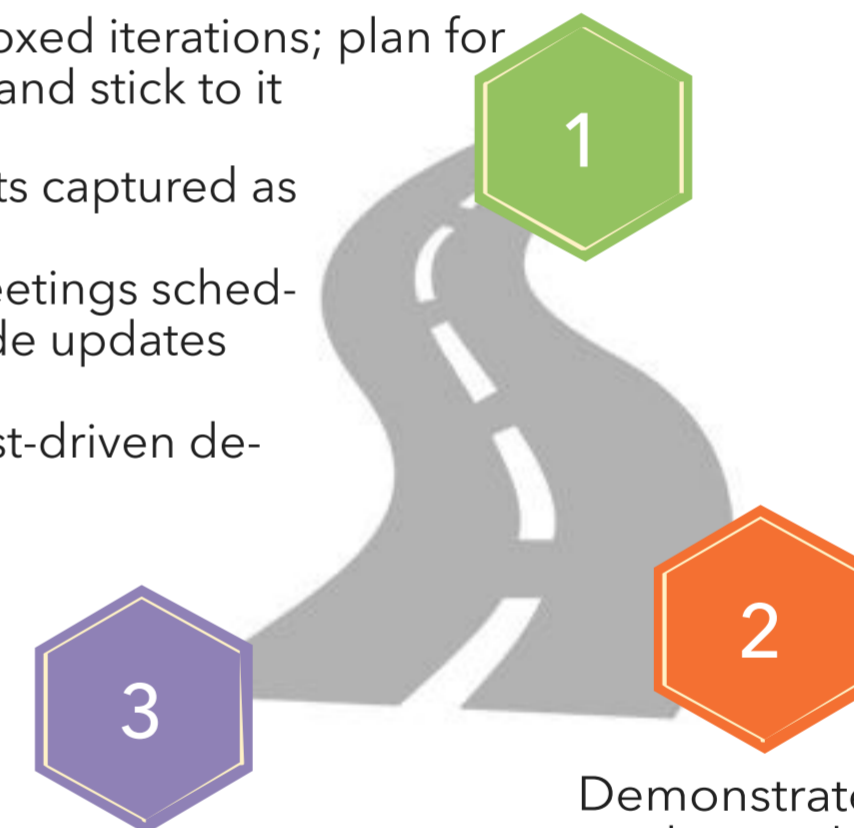

Frequent reviews of the project documents with clients to conform that requirements objective are being satisfactorily accomplished

UI Testing Pixel Perfection

Content Testing

Functional Testing Story Level

Integration Testing Sprint Level

Performance & Regression Testing App Level

User Acceptance Testing- Customer

7
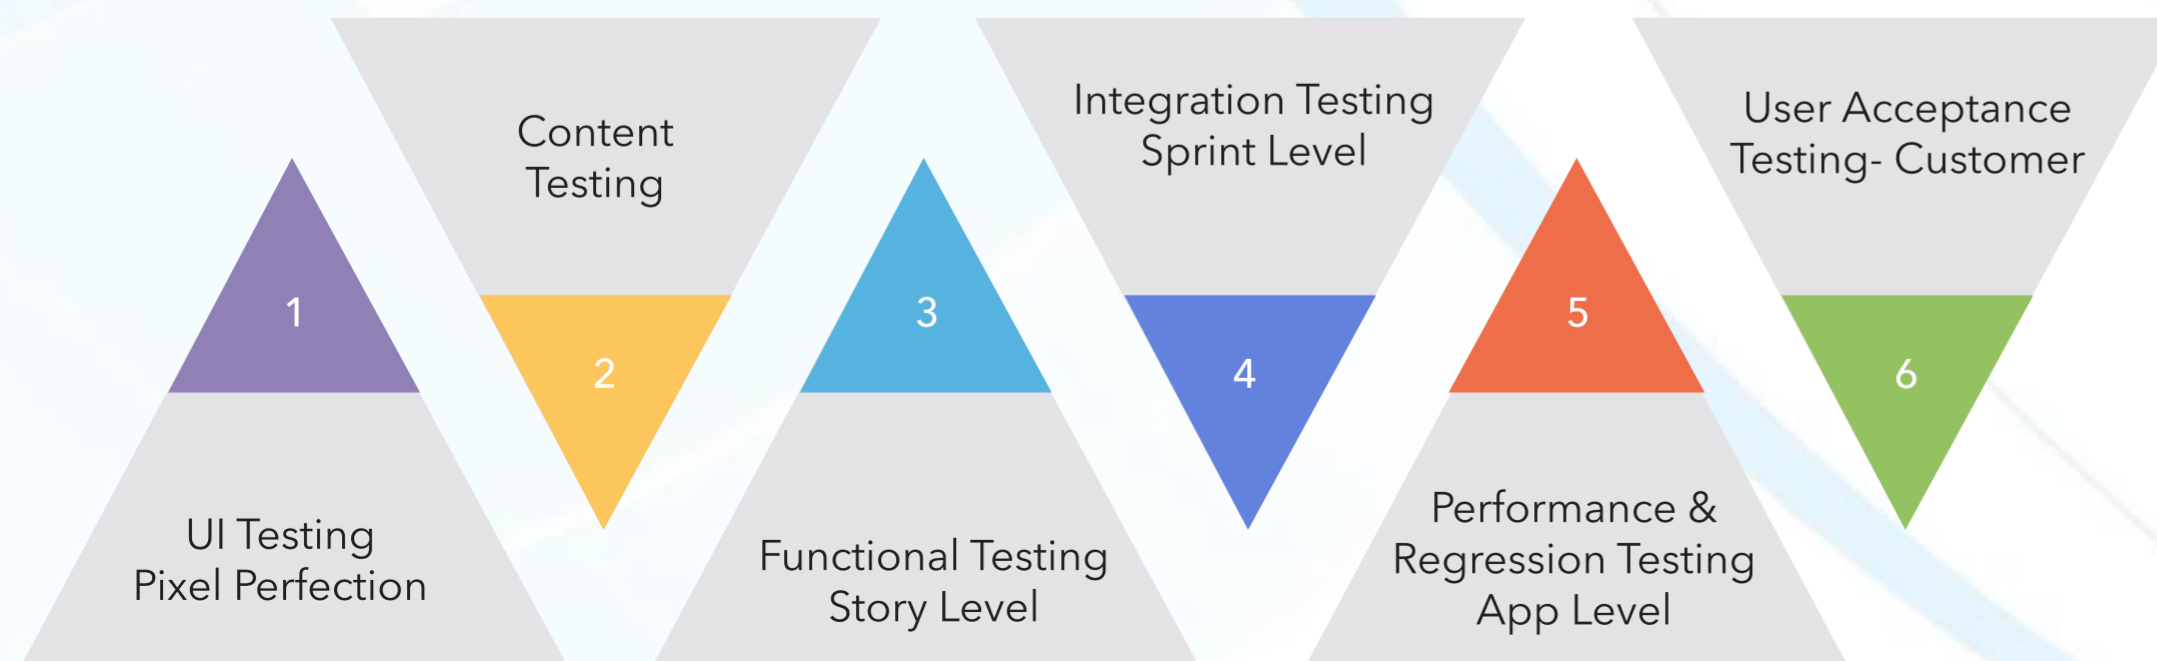

OUR SERVICES

CRM & ERP

Since its inception in the year 2009, Tekshapers has been empowering businesses with its perfect CRM & ERP software applications. Enterprise Resource Planning (ERP) and Customer Relationship Management (CRM) act as the backbone of any business by automating and supporting the overall business process including bookkeeping & financial reports, running payroll & recruitment, sales & customer service management, and projects to inventory management. In various industries, be it banking, finance, hospitality, manufacturing or education, our expert & strategic ERP & CRM implementation have always brought great value to our clients.

- Insurance Purchase /Claim APP
- Loan APP
- Movies-Videos-Music APP
- Virtual Reality APP
- Wallet APP

ARTIFICAL INTELLIGENCE

Tekshapers Software Solutions have vast experience in Data Process , Data Analytics - Converting data into Intelligent Results and Compilation.

In AI our team is working with animal disease diagnosis in villages where there is no treatment, working same for skin diseases in humans in villages where the disease can be diagnosed and treatment and medicine can be provided promptly through APP consultation online and providing online medicine.

We are also planned to work for assisting farmers to identify crop diseases via image recognition and AI.

Further on image recognition we develop our custom app to provide all data on APP or through SMS / VOIP in Non Internet Areas (Rural Areas)

Artificial Intelligence - Is basically turned out in concept when strong algorithm writing skills with machine integration came into existence at our side , we create a collection of database object- ex. leaves, crops, illness skin images, animal diseases - In very vast details and with multiple angel.

Engineers writes or uses a strong algorithm considering many facet of values and Input.

Algorithm Writing - AI based super optimized algorithm to map the record on fraction of second by identifying color combination, shapes, corners, textures and centers of unique shapes to recognition objects.

Detecting Skin Disease through App in Rural Areas
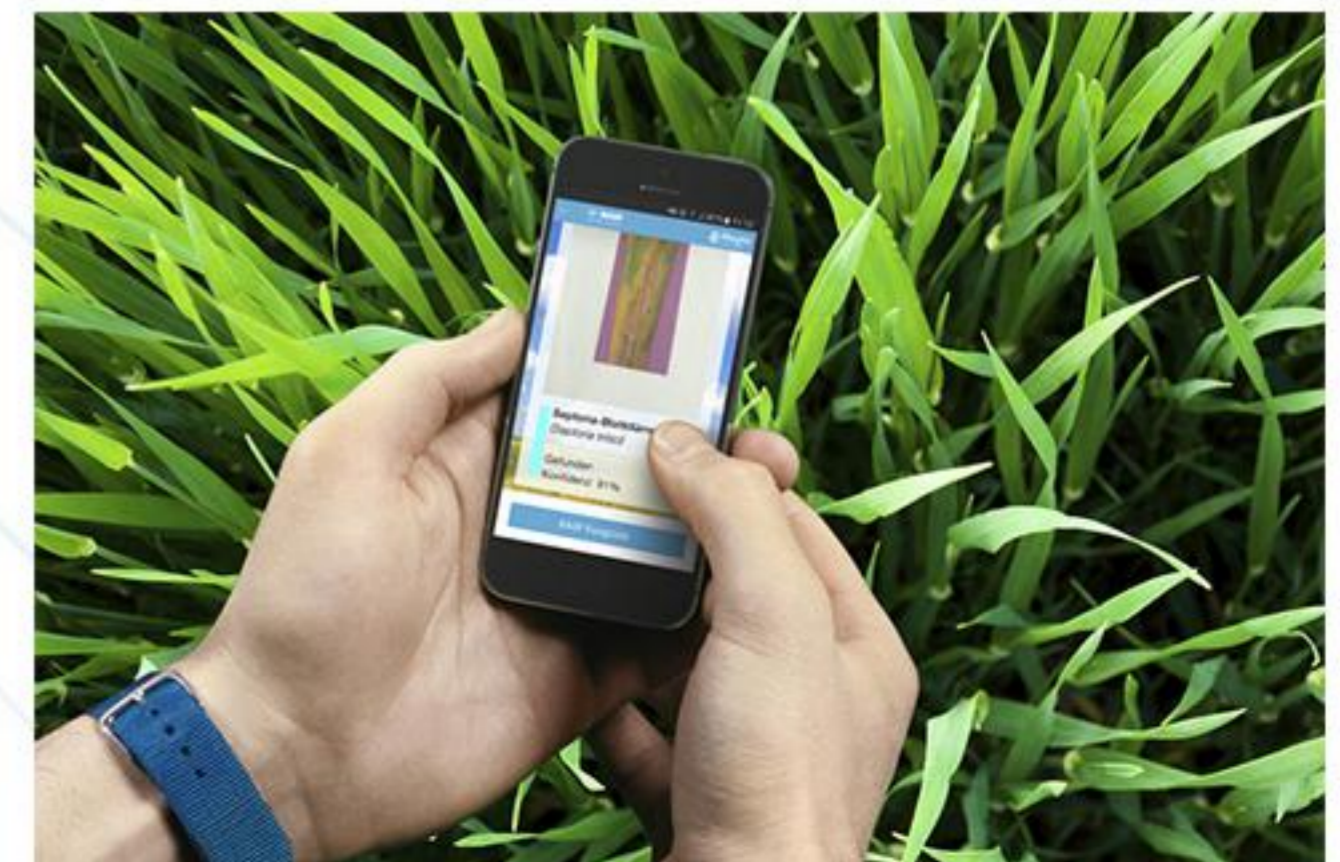

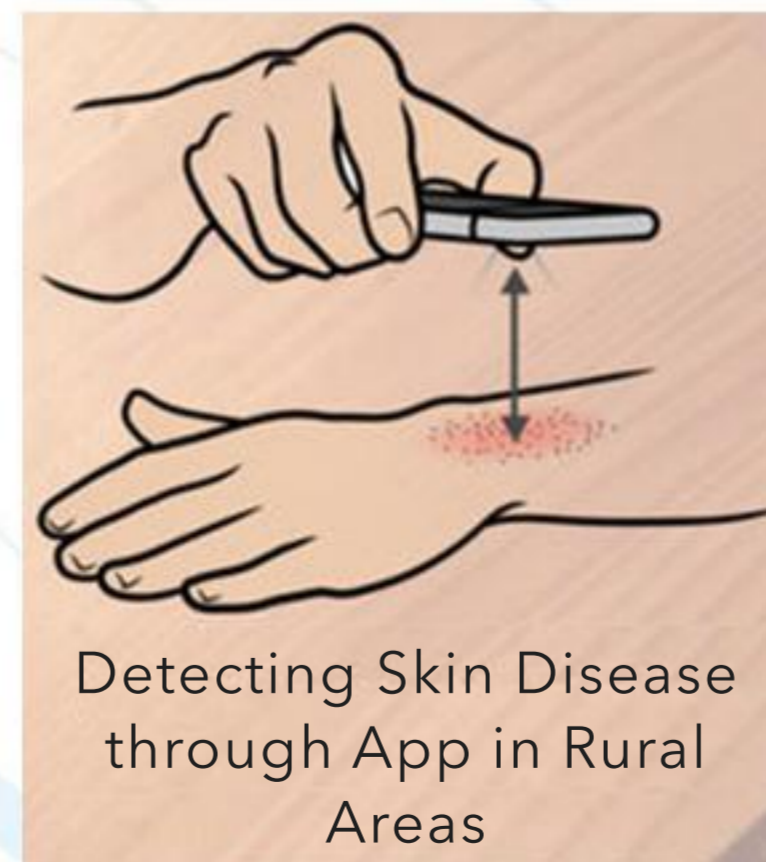

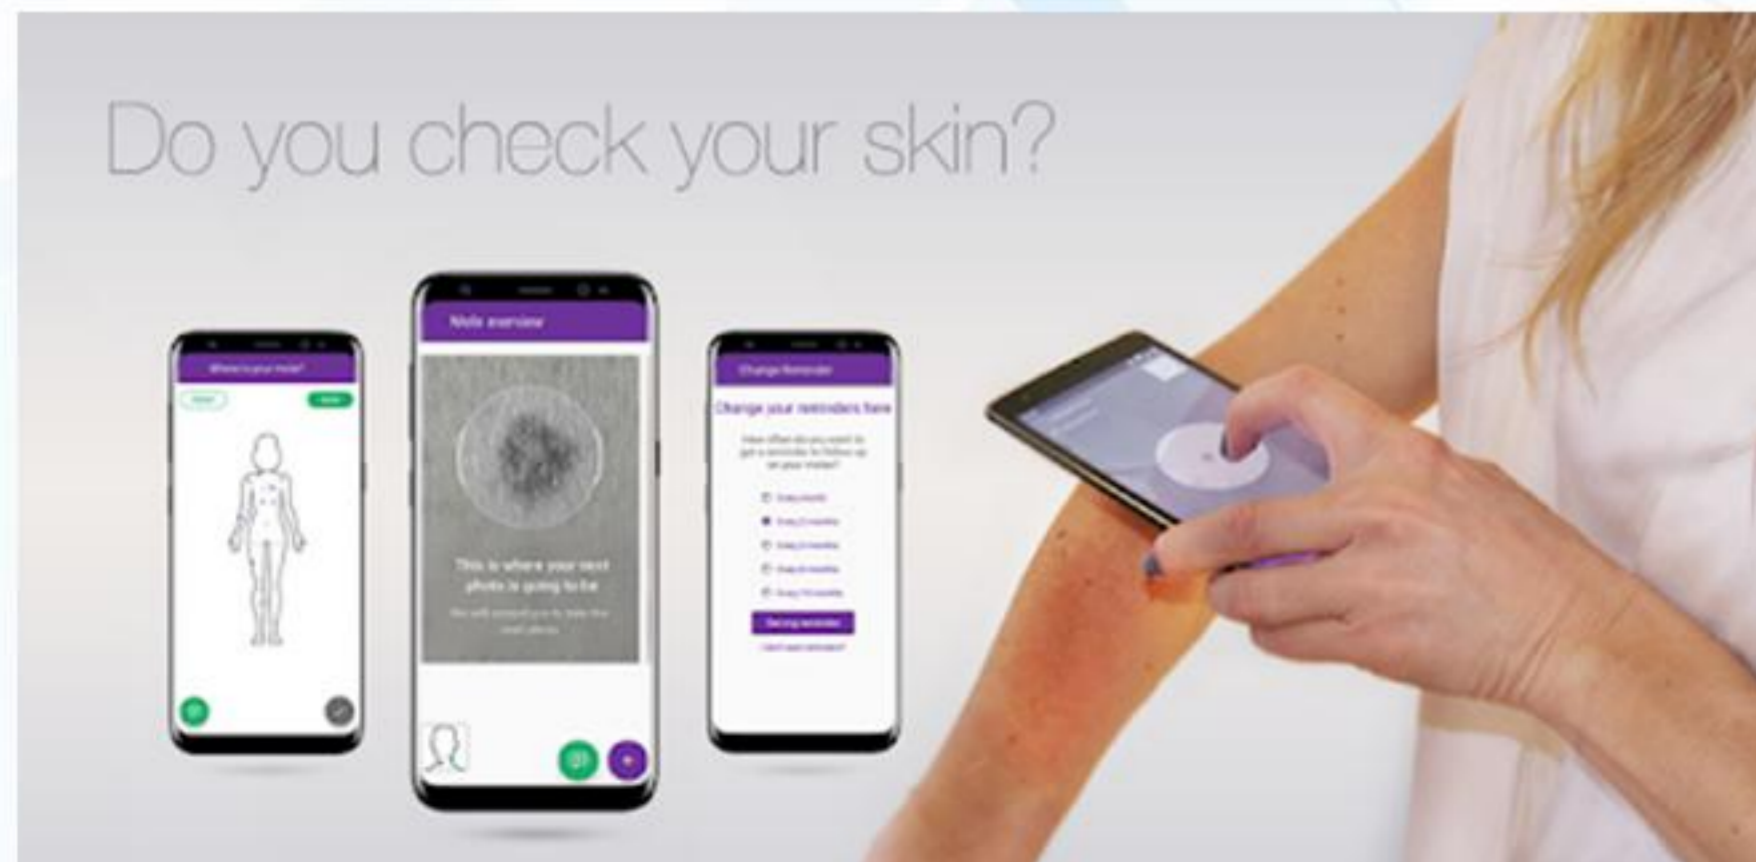

BEACON INTEGRATION

Tekshapers has been an expert in Beacon integration that provides a unique experience to its customers in most innovative ways. Our Beacon technology has been helping our clients with mall automation & retail automation and has provided a greater platform for interaction which not only builds a positive brand image, but also a stronger bond & connection between the clients & its targeted customers. Beacons is a Bluetooth low-energy (BLE) wireless technology that locates customers location in stores and other places and to deliver messages on their mobile devices. Our R&D team does a detailed analysis to understand the various facets of the technology & come up with custom solutions to address the specific business requirement.

**Beacons are already being used for:**

Tracking

Analysis

Navigation

Interaction

Security

CLIENT TESTIMONIALS

Tekshapers
shaping intelligence...

They fully understood my brief for my CSI platform and provided a full spec to read/amend before build commenced. I will use Tekshapers again for not only daily support for the system but for any other new requirements I may have.

Tekshapers went above and beyond developing our CRM. They excelled in communication and understanding the product. The work and design were well done. Would recommend them to anyone looking to build a custom CRM.

A real pleasure to do business with Tekshapers. Highly recommended and will definitely use again! Thank you for a good work well done.

This is to extend our sincere appreciation for the Consultancy service provided by Tekshapers in developing "Online Reporting Management System". We have professionally enjoyed working with Tekshapers and would be pleased to recommend Tekshapers services to any other Organizations.

Tekshapers solution and delivery capabilities in the region not only improved the time to market and predictability, but reduced the cost of implementation.

Another great set of amends, thanks for being so helpful and offering solutions for every single aspect of the app.

We would not have achieved this kind of success without a committed partner such as Tekshapers helping us all the way. We are glad we chose Tekshapers for this project – they bring in world-class consulting skills, superb project execution capabilities, and a high degree of predictability and reliability, besides technological excellence to customers.
